

Since its foundation in 1995, Fricke und Mallah Microwave Technology GmbH in Peine / Lower Saxony has been a leading manufacturer of microwave heating, drying and plasma systems, microwave generators up to 100 kW based on semiconductor, inverter and magnetron technology as well as microwave components (combiners, insulators, directional couplers, tuning units, waveguides) for the automotive, aviation, wood, ceramic and food industries. The operating frequencies are currently mainly 915 MHz and 2.45 GHz.

To reinforce our team, we are looking for a

Mechanic (m/f/d)

Your duties:

Assembly of mechanical components. In addition, there is drilling work, as well as occasional turning and milling work. Assembly is carried out according to instructions.

Your profile:

Completed training and relevant professional experience (possibly industrial mechanic, plant mechanic, mechatronics engineer, also related), willingness to travel.

We offer:

Independent, but also team-oriented and responsible position in a challenging and varied field of activity.

Please, send us your entire application papers in:
